Disclaimer: The information contained herein is compiled from a variety of sources and is provided for informational purposes only. Due to circumstances beyond the company's control, information related to prospective drug launch dates is subject to change without notice. This information should not be solely relied upon for decision making purposes. Products containing a Paragraph IV certification inherently involve risks and uncertainties that cannot be predicted or quantified. Actual results may differ from those expressed or implied in this report depending upon a number of factors. These factors include: the difficulty in predicting the timing and outcome of legal proceedings, including patent-related matters such as patent challenge settlements and patent infringement cases; the outcome of litigation arising from challenges to the validity or non-infringement of patents covering products; the difficulty of predicting the timing of FDA approvals; court and FDA decisions on exclusivity periods; and the ability of competitors to extend exclusivity periods for their products. Forecasted launches only includes brand drugs whose annual sales exceed $100M.
